

How to fold

1. Push the supporter behind the board into the original position so that the board returns to the original position.

Push the stoppers at the bottom of the board into the original position.

2. Push the lockers into the original positions so that the legs will be placed flat, then push the legs into the original positions.

3. Take out the USB from the socket, and put it into the original place.

4. Fold the table by closing two sides of the table.
